

JTLYK YEAR ONE  
Friday 16th October 2015

### Maths

This week the children have learned to measure using non standard units such as unifix, compare bears, hand spans and fingertips. We ordered objects using the vocabulary 'tallest, taller, smallest, smaller'. We learned to estimate how long objects are and then measure carefully.

At home why not line up your cuddly toys in height order - which one is the tallest? The smallest? Which ones are smaller than the blue one or the red one? etc.

Dear Parents

What a great first half term we have had with the children! Thank you for helping them settle so well into Year One. The children have worked so hard, become more independent and taken on new challenges.

The children are really enjoying our new 'Vet Role Play' area and are impressing us with their knowledge of pet anatomy and clinical practice!!

There will be no **Wild Place** next Tuesday 20th but do please sign up for the remaining weeks in November and December.

We are looking forward to our **Victorian School Room trip on 17th (Oak) and 18th (Beech) November**. Letters will come home during the first week back. We will need parent helpers so please come if you can. It is a lovely morning!

Look in your child's JTLYK book for phonics games to play together, plus 2 reading books for the holiday.

We hope that you all have a safe and restful half term holiday.

Sarah and Sheena :))

We are very excited about our 'Bears' topic next half term.

PLEASE SEND THE CHILDREN TO SCHOOL WITH THEIR TEDDY/SOFT TOY ON THE FIRST DAY MONDAY 2ND NOVEMBER. We will also be asking to borrow parents' old toys (if you still have them!) so that we can share them for our very own 'Toy Museum' in a few weeks.
