

Just to let you know...

As you know, our topic this term has been based around the natural world and we have learnt all about growth and reproduction in plants.

As part of our school PSHE programme, next week we will be introducing human development to the children. The issues that we will be addressing are: the changes that happen at puberty and how humans grow and develop into adults.

We had an amazing time at James and the Giant Peach today!

Why not ask your child to tell you all about what questions they are researching for their Leap?

Have a great weekend!

From Mel, Julia

Sheila and Vicki

In Maths this week, we have been looking at the translation of shapes. We have looked at identifying different translations and have had a go at translating shapes ourselves. We have also looked at division questions; choosing the most efficient method to use, for example a number line or the chunking method.

If you would like to support your child further, have a look on the MyMaths website and select level 4, number, multiply & divide written and select the chunking method.

This Week's Spellings

their	through
there	whole
threw	where
two	they're
too	
right	heard
write	reign
knew	weight

LEAPS

This week the children have started their LEAPS:

Learning and Development

Everybody learns at different rates and all areas of learning and development are equally important and interconnected

Enabling Environments

The environment plays a key role in supporting and extending children's development and learning

A Unique Child

Every child is a competent learner from birth who can be resilient capable confident and self assured

Positive Relationships

Children learn to be strong and independent from a base of loving and secure relationships with parents and family.
