

## English

English this week we have been practising our reading and answering questions about what we have read. We have written letters to the Natural History Museum explaining our amazing dino-dig and asking questions about fossils.

## Maths

This week we have been looking at properties and characteristics of 2D and 3D shapes & identifying fractions of shapes, quantities and numbers.

We have been really impressed with all the shape practice that children have done at home. Thanks for the photos!

## YEAR 2 NEWS

### Natural History Museum Trip

This week you will have received the letter about our trip to the Natural History Museum on 14th June. Please complete and return the form at the bottom of the letter and return it to school before half term.

We only need a limited number of helpers, but if you would be available to help with the trip, please let us know.

### MATHS FUN WEEK

Next week we will be focussing on all of our Maths learning from this year so far. Please ask your child about what they have been learning each day.

## Tricky Words

Tricky words are any words which the children need to write frequently, but are not easy to spell. We will be sending tricky words for the children to learn in their phonics books over the next few weeks.
