

# Baffling Bodies

We would like you to research the answers to 10 of your own questions about the human body.

Use a mixture of non-fiction books and websites to find things out.

Then IN YOUR OWN WORDS (do not copy and paste) create a booklet of the information you have discovered.

You have until Monday 8<sup>th</sup> February to complete this project. In order to pace yourself, you should try to do 3 to 4 questions each week. So we can help you with this, please either bring in (or email) your work each Monday.

Remember to include pictures and diagrams to help explain what you have found out, and to make your answers eye-catching, interesting and fun!
