

Just to let you know...

Dear parents,
It has been another exciting week of learning in year 4 and the children have been working brilliantly. Thank you again for your hard work with making sure they have their homework books, reading journals and PE kit in school on the right days. We really appreciate it.
Have a lovely weekend.
Sarah, Emily and Nick

Science

Science has been a huge hit again this week in Year 4 for as we looked at another force. We investigated friction by looking at how our shoes moved on the tables when we tipped them up! It was a real moment of 'Zest for learning and a love of life' as the children gasped at the results!

Maths

This week our focus has continued to be on fractions. We have moved onto adding and subtracting simple fractions with the same denominator e.g. 2 quarters plus 3 quarters.

We have also had fun looking at word problems involving fractions.

Well done to everyone for their fractions homework last week. We loved looking at the wonderful work that was produced.

Spellings

The spellings for this week are below:

mixture, adventure, picture, capture, feature, nature

English

We have continued to read George's Marvellous Medicine by Roald Dahl. We finished writing up our recipes and shared them with our classmates. We then explored the formalities of writing a script and the children acted out a short scene in small groups. The children went on to write their own scene from the book as a play. The children added stage and character directions to bring their scene to life.

Homework

This week's homework is a bit of revision looking at capital letters and full stops.

This is something that we need to continue to practise as they often disappear from the children's writing.
