

CURRICULUM NEWS

Maths:

This week in maths we have been exploring mass. We have used a variety of scales to compare weights, measure accurately and read off scales. Can your child tell you approximately how much an apple weighs?

English:

We have been using all our skills in informal letter writing this week to ask a friend or family member to look after our flat evacuee. Where is your child sending their flat evacuee?

Science:

We kicked off our new science topic for this half term, Light and Shadows, by learning all about the sun. Can your child remember some interesting facts about our star?

Reminders and Notices

Addresses please!

As part of our topic this term we send a 'flat evacuee' off with a letter to someone we know who lives in a different place. We need the addresses of grandparents, friends, etc. as soon as possible to send our evacuees off. We hope to get replies before the end of June.

Please could you write the address in your child's reading journal.

Henley Fort

Our class trips to Henley Fort are next Wednesday (3C), Thursday (3N) and Friday (3G). Please make sure your child is wearing appropriate clothes and has a raincoat and packed lunch with them. We meet at the fort at 9:30. The walk back to school is quite tricky so all classes would appreciate any help in walking the children back. Please email the your class teacher if you are available from 2:30. It should be a really great day!
