

JUST TO LET YOU

Maths

This week in maths the children have been focusing on time. They have been learning to convert between a 24 hour digital clock and an analogue clock. They have also been converting between units of time, for example seconds to minutes and minutes to hours.

Science

The children had great fun in science investigating and experimenting with simple circuits. They worked in small groups to predict and test whether certain circuits would work by turning on a light bulb. They also investigated the effect of adding multiple batteries and also more than light bulb.

Transition Days

The last two days of the week were spent being very creative! The children researched exotic islands before designing and building their very own. They were asked to think about tickets for their island, travel, cuisine and much more!

Reminders and Notices

Please note that on Monday 27th June there is a Mid-Summer Holiday. There will be no school on this day.

Please remember to invite older family members or friends who had first hand experience of WW2 to our Year 3 Tea Party on the 19th July.
