

Helping your child with phonics

We have enjoyed working in our phonics groups this week, practising the sounds we already know and even learning some new ones! The support you give them at home is invaluable. Please pop in and see us if you have any questions at all.

Maths Measuring

This week has been very exciting learning about measuring! We learned about 1 metre and used a 1 metre long strip of paper to find things longer and shorter than 1 metre. We also used rulers to measure things around school in centimetres. Why not have some measuring fun at home with a ruler! How long is your favourite book, your teddy and your toothbrush? Can you put them in order from shortest to longest? How much longer is your teddy than your toothbrush?

Dear Parents,

This week we have had an amazing time using story maps to help us retell and make up stories. Story maps use pictures and just a few words to tell a story. We are very proud of all the children's work! Beech Class made up 'It's Too Noisy' and Oak Class made up 'The Dragon Who Made a Friend'. Ask your child to tell you our class story, complete with sound effects and actions!

To conclude our exciting week we had a fantastic time doing our Fluffy activities! Fluffy is a great time for the children to try new activities, to make new friends and to work with new teachers.

Look out for the lovely photos on the website.

Emily and Sheena :)
