

Just to let you know...

Dear parents,

We have had another busy week in Year 4 with more science investigations! The children have been working really hard on getting everything ready for the science exhibition next week. Thank you also for all your donations in aid of Red Nose Day.

Have a great weekend!

Jo, James, Rachel, Maggie and Izzy

English

This week we have continued to design our brochures and make posters advertising our crazy/creative inventions. The children have been working hard and thinking about how to make people want to buy their invention. We hope that you will enjoy celebrating their work with them on Wednesday.

Maths

We have been practising estimating and rounding this week and the children have learnt how helpful estimating can be. We have also looked at using the inverse to check answers and applied written methods to word problems involving estimation. Why not ask your child to explain the rules of rounding? You could also estimate how many items are in different packets! We have also had a go at adding and subtracting fractions with the same denominators.

Church Walkers

Just a reminder that we need parent help to walk the children to church next Tuesday (29th) at 9am. Please email your child's class teacher if you are able to help.

Bentley Copse

Thank you to those who attended the Bentley Copse meeting on Tuesday. We hope you found it useful and informative. As we said, please do email us if you any concerns or questions. If you didn't attend the meeting, a pack has now gone home with the following: an information letter, a letter of consent, a medical form and a kit list. You can now make the payment on ParentPay of £85.

Homework

Homework is for the children to continue to make their science inventions. These will either be creative or crazy! Please see the sheet we have provided the children with to help them to finish their invention. These need to be brought in on Monday 27th.

Spellings

Thank you for helping your child to learn their spellings. The spellings for the test on the 27.03.17 are: internet, intercity, international, interact, interview, submerged, subscribe, submarine, subway, subdivide

Science Exhibition

There will be a chance to view the children's projects at our science exhibition on Wednesday 29th March at 2:15pm. We are really looking forward to this and the children have been working so hard! We hope you can join us for this special afternoon.
