

Year One

Beech and Oak

10th May 2019

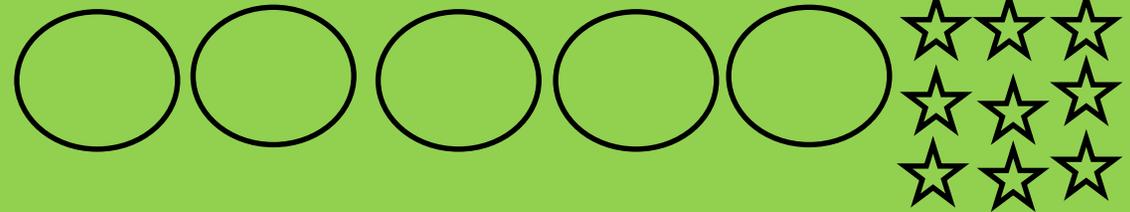

Science

This week we continued our investigation of what plants need. We updated our results table and discussed whether our predictions were true or false. The plant with water, light, nutrients and warmth did grow to be healthy while the plant without light grew unhealthily and the plant without water failed to grow at all.

Maths:

We have now moved onto talking about division and sharing. In Year 1 we consistently use the language of multiplication and division rather than the signs. This week we talked about sharing between equal groups. We worked through lots of examples where we shared the same amount between a different number of groups. Have a go at the task below:

1) What is 10 shared equally between 5 groups?

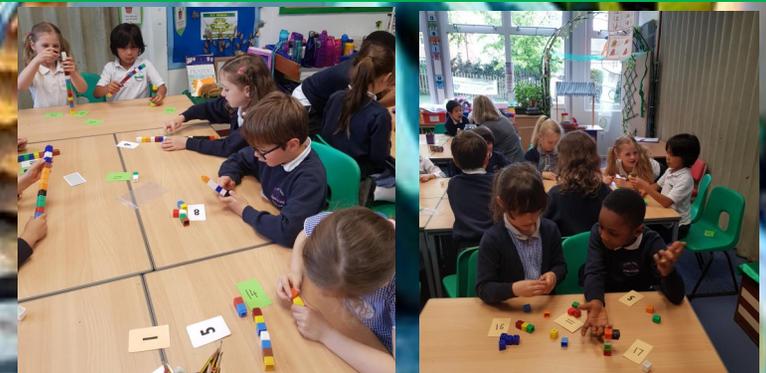

2) If I shared 12 sweets between 4 children how many sweets would they have each?

Plastic bottles

We are making musical instruments in music next week using plastic bottles. We would really appreciate it if you could save at least one plastic bottle and send it in with your child on Tuesday the 14th of May. The size of the bottle does not matter. Thank you!

Writing

We finally got to move on to adapting The Enormous Turnip this week. We had a lot of fun adapting the characters and the problem. We enjoyed hearing your children read their stories in front of the class and liked the range of descriptions used for the different nouns.

We hope you have a great weekend
Georgie and Claire
