devotion  
potion  
ambition  
solution  
conclusion

In Group Maths this week we have been looking at Money. We have investigated pounds and pence notation and talked to the children about effective ways to add and subtract different sums of money. We have also set the children real life word problems involving money.

In class maths we have continued to investigate angles and rotational symmetry linking this to clock-wise and anti-clockwise turns.

Enjoy being outside this weekend!  
Best wishes  
Tracey, Nick and Alison

In science this week we have been looking at solids, liquids and gasses. Each class did an observational experiment using ice cubes, cling film and candles. We heated the ice cubes up and watched as they changed from solids to liquids and then to a gas. We then took the heat away and watched as the gas condensed.

## LITERACY

This week we have been working on writing our own newspaper reports. We have looked at all the features of newspapers and the children have begun to think about possible headlines for their own stories.

The classes are really excited about putting their newspapers together! If you read newspapers at home please encourage your children to look through and investigate interesting stories.

Please send in any old magazines as we will start to focus on advertising techniques and persuasive writing during the next few weeks.
