

Just to let you know...

Maths

This week in maths we have been learning about patterns and sequences. We started off looking at patterns using shape and then we moved onto patterns in number. We thought about basic patterns of times tables and then tried answering some trickier questions involving negative numbers and decimals.

Carol Singing We would love to take the Yr 5 children to sing carols to the elderly residents of Addison Court on Thursday 17th Dec. We will meet in the hall at 4.45 and then go across the road to sing. They would like to give refreshments to the children afterwards, with an approximate end time of 5.30pm.

Religious Education

Over the term we have been looking at how Jesus' teaching challenges people, how parables were used and their impact on how Christians live. This week the children have been thinking about Advent and making links between biblical texts and Christian beliefs. Inspirational poems have been produced by the children on this theme.

Spellings

The children will bring home a list of words they have misspelt during this term.

HOMEWORK

The children will have brought home an outline of a Christmas stocking. They need to write on the sheet all the things that they can 'give' at Christmas that show love and kindness and then colour it in.
