Thursday 5th:
Snack 2:30-3:30

Friday 6th:
Breakfast 7:15—9:00 x 2 helpers
Breaking camp 8:00—11.30

Thank you!

ENGLISH

This week the children have been writing newspaper articles about discovering new species of plants!

They have learnt how to use subheadings to help the reader navigate through the text.

Why not ask your child what new plant they have written about and how it was discovered?

Dear Parents,

Many thanks to those of you who have signed up to help us at Bentley Copse. We really appreciate your support. There are only a few slots left to fill, so if you are able to come and join us then please let your child's class teacher know.

BIBLES! Please send your child's bible in to school on Monday as we will need it next week for our RE sessions.

Also, just to remind you that this week we have viewed and discussed a DVD on changes. This covers the changes our body go through as we grow up in preparation for adult hood.

Our Sex Education and Relationships Policy on website and please feel free to come and ask any questions, should any arise.

Thanks and have a great weekend.
Julia, Sheila, Jess and Seonaid.

teacher
catcher
discover

pollination
dissection
lifecycle
adventure
pressure
creature
enclosure

SCIENCE

This week we have been learning about all the different parts of a plant. We have dissected tulips to locate and understand the functions of each part of a flower. Ask your child if they can name the male and the female parts of a flower?

MATHS

In Maths this week, Year 4 have been focusing on division and using the short 'bus stop' method to work out problems which may even have included a remainder.

If you would like to practise division at home, log on to the MyMaths website and click onto Level 4. Then select 'Number' and from the drop down menu select 'Multiply Divide Written'. Finally, select 'Short Division' and work through the online lesson/homework.
