

# Just to let you know...

## *The Once-ler*

This week in English Year 4 have decoded a message from the *Once-ler* and were given a magical seed to plant. We also compared and contrasted different seed packets and have written instructions for planting our own magical seed.

**What will our seeds grow into?**

In maths this week, Year 4 have been learning how to calculate a fraction of an amount (quantities or shapes).

For example:  $\frac{1}{5}$  of 30 plums.

Have a go at the mathematics 'model fractions' challenge set for this week.

<http://www.mathletics.co.uk/>

If you would like more support on working out fractions, then go onto the MyMaths website, login and select level 4. Once here, click onto 'number' and then the 'fractions' folder. Here you can work through the lessons on fractions.

**Login = pewley**

**Password = squared**

Times tables tests continue to be on Wednesdays and spellings on Mondays (they will start again next week).

Dear Parents,

We hope you had a lovely Easter break. We have had a fun-filled week launching our new topic for the term.

Please can you remember to read and fill in the Bentley Copse forms—please return them ASAP! Also, please can you continue to hear your child read three times a week and write it in their Reading Journal.

Have a great weekend,

Mel, Julia and Sheila.

## **SEEDS and SEED PACKETS**

Please continue to send in any spare seeds and glass jars that you may have, which we could use for our *Once-ler* topic.
